APPLICATIONS

	FLOOR	WALLS	SHOWER FLOORS	SHOWER WALLS	OUTDOOR FLOORS	OUTDOOR WALLS	POOLS
Residential	●	●	●	●			●
Commercial	●	●	●	●			●

Chemical resistant
Class A Tile is suitable for areas where exposure to common household or industrial chemicals is expected

Recyclable content:
Up to 40%

Modular
Designed to fit a variety of patterns, offering installation flexibility.

Resistant against scratches and stains

Fire - safe and can tackle up to 300°F temperatures

Withstands UV exposure and resists fading

Stands strong against frost and moisture's grasp

Resilient under shocks, solid under significant loads

DETAILED SPECS

COUNTRY OF ORIGIN	FINISH	SHADE VARIATION	MOHS (Scratch Resistant)	DCOF Acutest	FROST RESISTANT	CHEMICAL RESISTANT	RECOMMENDED GROUT JOINT
SPAIN	MATTE	V4 (HIGH)	4	>0,42	PASS	GHA/GLA (UNAFFECTED)	1/8"

Inspect all boxes and materials before use and getting started. Recommended grout joint: 1/8". Do not use mastic; use modified premium thinset. High variation (V4) due to handmade look of the collection. A Dry lay or mockup must be done prior to installation to confirm variation is applied correctly, layout, grout joint size and overall look meets your expectations of this line. Blend tiles from different boxes to obtain consistent shade distribution. Installation constitutes acceptance of the product. Improper installation, application, use and care/maintenance voids warranty. Follow our guidelines, TCNA and ANSI specifications. This is an artisan product and therefore tile may change in color/shade/tone, size, finish and texture. Order multiple samples to make sure you are happy with your selection. Always order from the same lot for your project, as these variations will be more noticeable on different production runs.

Contact us at info@alteaceramics.com if you have any questions.
